## KEY TECHNOLOGIES

### STRETCHDRY WATERPROOF TECHNOLOGY

Our Stretchdry technology enables us to produce a product which has a hydrophilic membrane, but unlike anything else on the market, we also incorporate a huge amount of stretch, making this product, waterproof, breathable, windproof and incredibly comfortable.

### MERINO WOOL

Merino wool is a wicking fibre which has the ability to absorb and release moisture to cool or warm, regulating temperature. Can absorb and release 10 times more moisture than synthetics. Merino has excellent anti-microbial properties, helping to reduce odour build-up.

### **Polycolon®** POLYCOLON

Polycolon is a lightweight performance yarn made from polypropylene. It's natural hydrophobic properties repel moisture adding an additional surface layer of protection. Fast drying times mean less time in wet kit. Soft to the touch allows products to be produced with a luxurious feel and superb performance.
